This is private property Also it is a tragedy that Maldivian people's possessions and lands are being damaged and set on fire. This is very wrong. What I can say is that I condemn this in the loudest voice. Something like this should not be done. I also make the appeal that nobody

should do anything to damage anybody's property or possessions or their lives or bodies. This is our nation. We should not destroy our country with our own hands. We all should obey the laws. Obey Islam. Everybody must according to law. Nobody is exempt. The government has to do the same. The military, the police, the public, parties, everybody should act according to the law. We should all be friendly and resolve this problem and take our country to a safe shore. I would like to say that. Do not set fire to anywhere. Do not do anything you will regret later. Everybody act in the ways that our glorious religion has instructed. Obey our Constitution. Respect our laws. Let's all unite to save the country. That is what I want to say. What I must say is that it is because the government is acting against the law. Because things are being done against the Constitution and the laws. Especially this judge of the Criminal Court Abdulla Mohamed was taken from his house in the middle of the night is a major atrocity. Something like that should not be done. I too believe that humans err. If somebody commits an offence, there are ways to deal with in law. The same for offences committed by judges. Therefore, it can be examined through these means. However, contrary to this, uprooting someone without notice while they are at home with their family and planting him elsewhere is a major crime. It is also condemned in religion. And it is condemned in our laws and international laws. It should not be done. I call for his immediate release. I call for his release and for the restoration of all his rights as a human being and as a citizen of the Maldives. I also call upon the government and the security forces to do everything according to the law and Constitution. I have to say what I already said before. To act according to our religion and our Constitution. Act according to the law. As you said, given that I am so far away from the events that are happening in the Maldives it is not easy for me to comment on anyone or anything in particular. Because I do not have the complete information. But, as a peace lover and a lover of all things good for the Maldives and its people and a lover of Maldivian development, I also call upon everyone to act in a way that will develop the country, resolve its conflicts, and bring prosperity to its people.
